

PROFILE

App and web developer building production Android and full-stack systems. Currently at Kosal Tech Solutions, working alongside Manju Global and AIVIDA — delivering Kotlin/Compose mobile apps, Next.js platforms, and the Go and Python services behind them. Computer Science Engineering student (2022–2026) focused on AI-powered applications and clean, maintainable architecture.

EXPERIENCE

Software Developer

Kosal Tech Solutions

CURRENT

- Build internal tooling and client-facing web systems across the company's delivery work.
- Developed Kosal-Link, a four-tool scraper suite — static downloader, browser-based scraper for JS-heavy pages, structure extractor, and a CLI that renders a live landing page, detects section boundaries, and exports selector-scoped components as a reusable blueprint.

App & Web Developer

Manju Global

CURRENT

- Mconnect — Android client for the Manju Groups project-management system: OTP authentication, HR, attendance, leave and chat. Kotlin + MVVM + Retrofit, AES256-GCM encrypted session storage, and a semantic colour-token design system driving light and dark from one source.
- Manju PMS platform — Next.js + Convex operations platform covering land procurement, legal and feasibility gating, channel-partner management, Excel/PDF reporting and an AI sales assistant.
- Airix Geo Tracking — Go service for location ingestion, live tracking, trip sessions and tamper monitoring on PostgreSQL/PostGIS + TimescaleDB, with Redis for live state and idempotency.
- Travel Desk — Next.js trip allocation and fleet billing: token-scoped driver pages delivered over WhatsApp with no driver login, OCR on uploaded odometer evidence, and explicit extra-km, cancellation and offline-completion states.

App & Web Developer

AIVIDA

CURRENT

- Deliver mobile and web builds end to end — interface, API layer and deployment — with a focus on shipping working product rather than prototypes.

MERN Stack Developer Intern

VEI Technologies

JAN-FEB 2025

- Developed full-stack modules using MongoDB, Express.js, React and Node.js.
- Built and integrated REST APIs connecting frontend components with backend services across agile sprints.

Web Development Intern

NoviTech

JAN 2025

- Designed responsive web interfaces in HTML, CSS and JavaScript, integrating backend services and optimising page performance across multiple modules.

SELECTED PROJECTS

EDUCATION

B.E. Computer Science

Dhanalakshmi Srinivasan College of Engineering

Coimbatore, Tamil Nadu

2022 – 2026

CGPA 7.43 / 10

TECHNICAL SKILLS

LANGUAGES

Python, JavaScript, TypeScript, Kotlin, Dart, Go

FRAMEWORKS

React, Next.js, FastAPI, Jetpack Compose, Flutter, Node.js

MOBILE

Android (Kotlin / Compose), Material 3, Flutter

BACKEND

Convex, Firebase, REST APIs

DATA

PostgreSQL / PostGIS, TimescaleDB, SQLite, Firestore

AI / ML

Machine Learning, Generative AI, Prompt Engineering

TOOLING

Git, GitHub, Docker, VS Code, Cursor

DEPLOYMENT

Vercel, Render

CERTIFICATIONS

ORACLE UNIVERSITY

OCI 2023 Certified Foundations Associate

Jun 2024 – Jun 2026

NXTWAVE

AI for Students: Build Your Own Generative AI Model

Sep 2024

GOOGLE DIGITAL UNLOCKED

Fundamentals of Digital Marketing

Jan 2021 · ID 6A5 5B9 RR5

RECOGNITION

- Published 'AI in Retail Marketing' — PSG College Conference
- MSME Hackathon — Rathinam Institute of Technology
- 3+ National Hackathon presentations
- MERN Stack Workshop — CIT Coimbatore, Feb 2025

INTERESTS

AI systems & applications, backend architecture, Android development, geospatial systems, AI product development, full-stack engineering.

Mentorix — AI Career Intelligence System

Python · FastAPI · RandomForest · SQLite · Vercel / Render

github.com/D-A-R-X/mentorix-ai

AI engine analysing student behaviour patterns to predict career instability and recommend personalised paths. Modular FastAPI REST services with a RandomForest model behind an explainable AI layer that returns reasoning, not just scores.

Darx Dialer — Default Phone App with Cloud Recording

Kotlin · Jetpack Compose · InCallService · Convex

Full default-dialer replacement implementing InCallService and the DIALER role — lock-screen incoming UI, Bluetooth routing, DTMF and hold. Per-call recording is consent-first: on-screen indicator, persistent notification and a user toggle, never covert.

Brownie Care — AI Companion Health App

Kotlin · Compose Canvas · Groq LLM · Convex · WorkManager

Health companion built around a character drawn entirely in Compose Canvas with spring animations — no image assets. DataStore is the source of truth with Convex as a best-effort cloud mirror, so the app works fully offline.

Megatron — Modular Adaptive AI Control System

Python · FastAPI · JavaScript

github.com/D-A-R-X/Megatron

Modular AI controller with a central reasoning layer that analyses intent and delegates to specialised modules — new capabilities added without rewriting core logic.

Smart Campus — Academic Resource Management App

Flutter · Firebase Auth · Firestore · Firebase Storage

[Play Store](#) — com.schrodingerlab.curiosity

Cross-platform app delivering centralised academic resources with offline download support. Deployed to the Google Play Store.

Drive Track Mate — Intelligent Driving Monitoring

Android · Dash Camera Integration · Event-Based Recording

github.com/D-A-R-X/drive-track-mate

Event-aware recording that auto-tags sudden braking and abrupt manoeuvres with timestamps and metadata, replacing unstructured continuous footage with retrievable evidence.

Fitcore — AI-Based Fitness Tracking System — in progress

Flutter · Firebase Auth · Firestore

Adaptive fitness progression using verified activity data and experience-based levelling — progress calculated from validated signals, not user-controlled inputs.
